

AGRICULTURE & BIOGAS SOLUTIONS

Aquasantec supports modern agriculture with innovative products that improve livestock management, water availability, food storage and renewable energy production.

Our agricultural range includes cattle feeding equipment, grain storage, fish farming products, watering equipment and complete biogas systems that convert organic waste into clean cooking gas and organic fertiliser.

Designed for African farming conditions, these solutions help farmers improve productivity while promoting environmental sustainability.

Products include:

- Biogas Digesters
- Biogas Funnels
- Cattle Feed Troughs
- Fish Tubs
- Grain Silos
- Flower Pots
- Watering Cans
- Water Storage Tanks
- Agricultural Storage Containers
